SET UP TIPS

To find the server settings (IMAP, POP, SMTP) for your account:

First you need to sign into your webmail account/student portal.

After you have signed in select the email "web app"

You should see an "Options" pull-down menu.

From this select "See all options..."

On the page that comes up, which should be the "My Account" tab on the "Account" page

You will see a link "Settings for POP, IMAP, and SMTP access..."

These should work for both iOS and OS X devices (and anything else for that matter.)

You will need to use your full email address (jlinehan@student.ccc.edu) as your user name for both IMAP and SMTP servers.

There are also links on the right side of the page under the "Shortcuts to other things you can do" heading to various setup instructions if you wish to setup your devices using exchange access.
