

MALCOLM X COLLEGE

EMT BASIC PROGRAM

CLASS OVERVIEW

The Emergency Medical Technician course is an intensive 16 or 8-Week course - depending on semester and time of year - that will provide the students training in the recognition of the signs and symptoms of illness and traumatic injuries, and how to perform life-saving skills. The course will consist of 160 hours of hybrid classroom lectures, online homework, manipulative skills in a lab setting, and clinical observations. The clinical requires a minimum of 25 hours. Which may include shifts in a local emergency room and / or on a transport ambulance. Schedule of shifts will be determined by the faculty and staff and made available to the students during the class to accommodate your schedule outside of class meeting times.

This program is intended as an introductory course to provide the student with basic skills and knowledge required to go on to Paramedic training.

A minimum score of 75% is required on the final written exam as well as a 100% pass rate on all EMT skills for successful completion of this class. There are no exceptions.

This class meets Illinois Department of Public Health regulations and is approved by the Local EMS (Region XI Chicago EMS). Upon successful completion of the course, students are eligible to register for the National Registry Examination.

Course schedules may differ from semester to semester. Please check the current Malcolm X College schedule for an up to date listing of the days and times it is offered.

WHO SHOULD TAKE THIS CLASS/CAREER OPPORTUNITIES
