## The Program

The Automotive Technology program at Kennedy-King College provides the necessary foundation and practical experience to pursue entry-level positions that meet the changing demands of the automotive industry. Entry-level positions may be found in automotive dealerships, automotive franchises, independent service repair shops, auto parts stores, or through self-employment. While being trained on the most up-to-date, and state of the art tools and equipment, taught by ASE and I-Car certified instructors, students will learn the technical skills essential to employment in the field of maintenance technology, auto body care, chassis, diesel, power train, and Hybrids.

### Kennedy-King College's Automotive Technology program also offers:

- NATEF/ASE Accredited Automotive training program
- High quality training with low tuition costs
- Day and evening classes
- Program is WIA Educational funding eligible (Workforce Investment Act)
- Hands-on training
- Web based training
- ASE Boot Camp that prepares students for ASE certification

## Degrees and Certificates

Kennedy-King College offers an Associate in Applied Science degree in Automotive Technology. The Associate degree is achieved by completing a sequenced and focused educational program, which includes a combination of Automotive Technology and General Education courses. In addition to the Associate in Applied Science degree, Kennedy-King College also offers Advanced and Basic certificates in specialized areas of Automotive and Collision Technology.

### Advanced Certificates

- Auto Body Technology
- Automotive Technology

### Basic Certificates

- Fuel Management Technology
- Automotive Parts Specialist
- Auto Body Reconstruction

- Automotive Maintenance
- Auto Body Repainting
- Chassis Maintenance

## Career Opportunities

Automotive technology is rapidly increasing in sophistication. The growing complexity of automotive technology requires that cars are serviced by skilled technicians. According to the U.S. Bureau of Labor Statistics, the demand for trained technicians will continue to increase, with even more opportunities for those who successfully complete postsecondary automotive training programs that allow them to earn ASE, NATEF, and I-Car certification.

### Employment Opportunities

- Service Technicians
- Service Advisors
- Parts Managers
- Auto Body Reconstruction Specialists
