

Dear Student:

Harold Washington College (HWC) is using this survey to measure whether general education goal of student understanding of and respect for human diversity is being achieved. This survey focuses on how well our students think we are doing to promote human diversity in the college community, and will allow us to learn more about student attitudes and experiences with human diversity. The results will be used to explore ways to improve student learning and programs at HWC.

It will take about 35 minutes to complete this survey. Your responses are important to us. Thank you very much for your cooperation in this important survey.

“Human Diversity” describes variations within the full range of cognitive, behavioral and psycho-social practices through which human beings share life in common spaces. Experiences of diversity include race, ethnicity, gender, religion, socio-economic status, sexual orientation, physical attributes and disabilities, age, health, language, education, political beliefs and other differences in cultural expression and tradition.
