Dear Esteemed Colleagues,

The Assessment Committee is assessing student learning outcomes in the natural sciences, and requests that you share the link below to the 20-minute Natural Science assessment. A large part of the success of HWC's Assessment Committee has been the strong faculty support over the years. Encouraging your students to take part in this survey is vital to us meeting our goals.

The survey is currently live, and the link is as follows:
<http://goo.gl/forms/WQ9qBYXFkD>

We ask that you share this link with your students via email, Blackboard, or some other method, copying and pasting it to avoid mistyping it. You may let them do the survey outside of class or during class time. Because it's voluntary, they will need lots of encouragement to participate, and we leave it up to you how to best handle this. If you would like, you may ask them to print or take a phone picture of the confirmation screen at the end of the survey to prove to you that they completed it. But again, this is entirely up to you. We would like this to be completed by December 5th.

You are free to do the survey for fun to see what it's like, but if you do please type "FACULTY" in the comment box at the end so that we know to disregard your entry for the data analysis.

Feel free to contact the committee analyst, Phil Vargas at pvargas21@ccc.edu or committee chair, Carrie Nepstad, at cnepstad@ccc.edu with any questions.

take care,
Carrie
