Narrowing Down

- Colleagues in my department formed small committees to identify student learning outcomes of interest.
- After discussions, two outcomes from Math 207 (Calculus I) were selected.

Interested in the Sequence:

Math 99

Math 140

Math 207

Pilot Assessment Tool

- An assessment tool (a small quiz) was designed with the aim to isolate skills that belong to each class.
- Plan to pilot this tool in a few sections of Math 207 before the end of this semester.

OpenBook

- Pilot results and the corresponding student data from OpenBook will be analyzed.
- The main goal of this analysis is to discover any patterns to guide our next steps.

Future Steps

- Present results of this small pilot to faculty in my department.
- With renewed faculty input, prepare a bigger assessment next semester.
