

5 WRIGHT COLLEGE ILO'S

Intercultural Competence:

Students interact with different cultures with an understanding of their values, beliefs, and experiences.

Critical Thinking:

Students apply a cognitive process involving questioning, analysis, synthesis, and reflection.

Communication:

Students exchange ideas through various modes of interpersonal communication and/or expression.

Information and Technology:

Students demonstrate the ability to design, implement, and evaluate technological and/or information resources to accomplish goals.

Personal Accountability:

Students demonstrate personal integrity and respect needed to create and sustain social, physical, economic and emotional well-being.

INSTITUTIONAL LEARNING OUTCOMES

Proposed by Student Learning Community through the guidance of instructors and staff through a survey

- What are the most important skills Wright College graduates should be able to demonstrate
- What are the shared institutional commitments to learning
- What are course-level, program level, college level, and district level goals/outcomes

We are not replacing Student Learning Outcomes which are specific, measurable, and learner centered

ILOs look beyond the "Ged Ed" Outcomes
